

Please do NOT allow cellular phone use on airliners in flight. It is a very bad idea, not because of potential interference but because of the noise and intrusions into privacy of other passengers. Many businessmen such as myself look forward to working or sleeping on our flights. The last thing we need is insensitive people jabbering away loudly next to us, and being powerless to stop it or even even object. It would take us back to the "bad old days" when smoking was allowed in airliners, and non-smokers had second hand smoke inflicted on us all the time. Noise pollution is almost as bad, and would become intolerable. PLEASE DO NOT ALLOW CELLPHONE USE IN FLIGHT.

Thank you
